

This jar contains raw, natural honey straight from the hive. Our special extraction process uses absolutely no heat or filtration in order to preserve the honey's natural flavor, nutrients and enzymes. This honey will naturally crystallize over time depending upon the flowers from which it was gathered. To soften or re-liquefy, place the sealed jar in a warm place or in warm water.

The hardworking honey bees that gathered the nectar to produce this honey are not exposed to toxic synthetic chemicals or antibiotics to control parasitic mites and diseases. The use of nontoxic organic methods helps to ensure the purity and superior quality of the honey harvested. This special care makes it ideal for use as both a food and for apitherapy. From the heart of nature, to you...enjoy!

A handwritten signature in black ink, reading "Ross E. Givens".
